

## Document Management Template

The document management template creates a search page where the visitor can identify key terms and words for the documents they are looking for. The resultant search results will show them pages, documents, images, and videos that match the key terms they entered.

**NOTE:** You will need to work with Communications [webhelp@phsa.ca](mailto:webhelp@phsa.ca) to build your search terms and the resultant search query needed for your page.
