

# Embed a video

---

To add a video to your page it must be hosted on a media site (for example YouTube or the PHSA Media Server). You can follow these steps to embed the video on your page.

The steps explained here are for embedding a video from YouTube. Other video websites/servers may behave differently but will give you instructions where the find the Embed code.

1. On YouTube, find the video that you want to play on your page and select it. The video will open in a new window.

2. Select Share to bring up the options, select Embed, and copy the code that is displayed in the Embed field.
